SIRESP TechDays 2023
May 31, June 01 and 02
Academia Militar, Amadora

Concept

Tech Days SIRESP aims primarily at discussing concepts and topics of interest related with the field of emergency and security communications. As an innovative activity within its framework, which had its 1st edition in June 2022, this event enhances and strengthens the SIRESP community links with industry, academia and its social environment.

Geared towards exploring current and mutual interest topics, **Tech Days SIRESP** creates a debate forum, in a way to stimulate engagement and cooperation between users and service providers of “mission-critical” communications technical solutions (**Seminar**).

Particularly focused on discussing realistic scenarios tailored to capture the operational drivers of future events such as the **World Youth Day (WYD)**, this initiative will enable national authorities and forces, as well as other organizations linked with the emergency and security community to train procedures in a customized context (**Exercise - War Room**).

Aligned with the goal of enhancing the development of competencies related with the SIRESP network, this edition of **Tech Days** focuses on acquiring skills, sharing knowledge and improving procedures and processes (**Training**).

The national edition of the **Innovation Challenge Contest** will take place on 02 June 2023. This nationwide contest, aimed at engaging higher education students, fosters the incubation and development of new ideas regarding the development and evolution of emergency and security communication networks and systems, connecting academia with the **SIRESP** community (**Innovation Challenge**).

At this edition of SIRESP TechDays the connection to international projects is also established via an **international workshop**, organized in close coordination with the DG Connect of the European Commission, including the participation of various European projects in the field of **5G Public Protection and Disaster Relief (PPDR) networks**.

Community of Interest

The learning experience provided by **Tech Days SIRESP 2023** is considered of particular relevance to the National Authority for Emergency and Civil Protection (ANEPC), to all Security and Armed Forces, as well as to all Entities and Authorities that are users of SIRESP at national, regional, and local levels.

Other entities such as connected to industry, Academia, and the Research and Development, (R&D) community will also find in this event an opportunity to share experiences.

Program

The three-day program (May 31-June 2 2023) is divided into four areas that are sequentially integrated: a Seminar, an Exercise and an Innovation and Training session.

Registration

Participation in Tech Days SIRESP 2023 is free, but registration is mandatory. For this reason, to guarantee your place, you are requested to complete the registration form(s) by May 22, 2023.

Transportation and accommodation are not included.
